

MULTIPACK Baling press

MP 836

The Plug & Bale machine MP 836 is a robust, vertical baling press in a low design for compacting cardboard and foil.

Fast and energy-saving
simple as never before

Plug & Bale
no on-site assembly necessary

Sliding door opens automatically
filling can be done with both hands

Operation via display
simple and convenient handling

State-of-the-art technology
High pressing force and fast cycle time, despite low drive power.

Safe and user-friendly
Ideal solution for retail and industry

Dense and heavy bales
with minimum energy consumption. The perfect solution for larger disposal volumes.

Plug & Bale - no on-site assembly necessary

Practical bale ejection system on pallet by key press

Simple binding system with either binding tape or binding wire

Automatic opening sliding door

Automatic operation - High operating comfort. The presence of an operator during the pressing process is not necessary.

Heavy and compact bales with minimal energy consumption. The perfect solution for larger disposal volumes.

Movable and fixed retaining claws for higher compaction of expanding materials e.g. foils

TECHNICAL DATA

TYPE	Compression pressure	Motor	Pressing time incl. return	Loading size	Filling opening	Pressing box W x D x H	Bale format	Bale weight
	kN	kW / V / Hz	sec.	mm	mm	mm	mm	kg
MP 836	260	4,0 / 400 / 50	40	1100	1200 x 600	1200 x 800 x 1550	1200 x 800 x 800-1000	300 - 400

TYPE	Recommended daily performance	Maximum baling performance	Vertical binding	Binding tape	Binding wire	Width	Depth x height	Weight	Fuse slow
	bales / day	bales / hour		mm	mm	mm	mm	kg	A
MP 836	5 - 10	2 - 3	4 v	13	2,5	1640	1150 x 2500	1600	16
